Jaipur, Rajasthan

OBJECTIVE

Senior Software Engineer with 3+ years of experience building scalable fintech, AI, and consumer applications. Specialized in React, React Native, and real-time systems (WebSockets), with strong expertise in API integrations and performance optimization. Proven ability to deliver high-quality, user-centric products across mobile and web platforms.

EDUCATION

- **Jaipur Engineering College and Research Center** Jaipur, Rajasthan
Bachelor of Technology in Computer Science and Engineering; CGPA: 7.55 (71.73%) Aug 2019 – June 2023

EXPERIENCE

- **Startup Labs Infotech Pvt. Ltd.** Jaipur, Rajasthan
Software Development Engineer II Nov 2024 - Present
 - Led end-to-end development of **MutualFundWala** (fintech platform), owning 100% web admin, 90% mobile app, and 70% backend APIs, improving development efficiency by 40% and reducing release cycles.
 - Implemented real-time features using WebSockets and reduced redundant API calls by 30%, improving app responsiveness.
 - Integrated 5+ third-party SDKs including Meta Pixel, CleverTap, AppsFlyer, Microsoft Clarity, and Firebase Cloud Messaging (FCM), enhancing user analytics, attribution tracking, and notification delivery.
 - Built core investment modules (portfolio tracking, goal-based investing, LAMF), enhancing user experience and increasing feature adoption.
 - Developed reusable components and optimized UI, reducing code duplication by 35% and improving maintainability.
 - Built **Instagram Auto DM** with end-to-end ownership and contributed 85% to **Formatr: AI Formatting Tool**, accelerating product delivery timelines by 30%.
- **Flitpay Pvt. Ltd.** Jaipur, Rajasthan
Software Development Engineer I Jan 2023 - Nov 2024
 - Developed **Flitpay** (crypto trading app) with real-time trading and analytics features, improving user engagement and session duration.
 - Designed and implemented 60–70% of UI/UX, reducing UI inconsistencies and improving user experience across devices.
 - Contributed to **Connect by FinkUP**, building chat and analytics modules to enhance real-time user interaction.
 - Integrated REST and GraphQL APIs, improving data fetch efficiency and reducing API response handling time.
- **Wait 4 Tech Services Pvt. Ltd.** Jaipur, Rajasthan
Front End Developer Intern June 2022 - Dec 2022
 - Developed responsive web interfaces using HTML, CSS, and JavaScript, improving usability across multiple devices.
 - Built reusable UI components, reducing development time for new features.

SKILLS

- **Frontend:** HTML5, CSS3, SCSS, JavaScript, TypeScript, ReactJS, React Native, Next.js, Redux, React Query (TanStack Query), RxJS, Tailwind CSS, Bootstrap
- **Backend:** NestJS, Node.js, Express.js
- **APIs & Real-time:** REST API, GraphQL, WebSockets, Socket.IO
- **Database:** PostgreSQL, SQL
- **Mobile & Analytics:** Firebase (FCM, Remote Config, App Distribution), CleverTap, AppsFlyer, Microsoft Clarity, Meta Pixel SDK, OTA Updates (CodePush)
- **Testing:** Jest, React Testing Library
- **AI Coding Tools:** Claude Code, Cursor AI, ChatGPT, Gemini
- **Tools:** VS Code, Android Studio, Xcode, Git, GitHub, Bitbucket, Jira, Postman, Flipper, Sentry, Figma, pgAdmin, AWS

PROJECTS

- **MutualFundWala:** Built a fintech mobile app enabling goal-based investing, portfolio tracking, and LAMF support. Implemented real-time data and automated investment workflows, improving user experience and reducing manual effort. The application has achieved **5K+ downloads on Google Play. Android — iOS**
- **Instagram Auto DM:** Developed an automation platform for Instagram direct messaging, enabling creators and businesses to streamline customer engagement and communication workflows. The application has achieved **1K+ downloads on Google Play. Android — iOS**
- **Formatr: AI Formatting Tool:** Built an AI-powered platform for academic formatting and citation management, reducing manual effort and improving document consistency. Contributed to both mobile and web platforms. The application has achieved **10K+ downloads on Google Play. Android — iOS**
- **Flitpay: Crypto Trading App:** Developed a cryptocurrency trading app supporting 350+ assets with real-time data, secure transactions, and analytics, enhancing trading experience and performance. The application has achieved **1M+ downloads on Google Play. Android — iOS**
- **Connect by FinkUP:** Built an event networking platform with AI matchmaking, chat, and analytics, improving attendee engagement and sponsor interaction. The application has achieved **10+ downloads on Google Play. Android**
- **Scratch Mobile App:** Developed a drag-and-drop mobile app enabling users to create animations and interactive projects without coding, enhancing learning and creativity.
- **Crypto Buzz:** Built a web app for real-time cryptocurrency tracking and news, improving access to market insights with live data updates.
